

### **NEW HEALTH PROJECTS LAUNCHED IN KSA**

Health Minister Dr. Abdullah Al-Rabeeah recently inaugurated the first phase of the Intensive Care Unit (ICU) wing of King Saud Medical Complex in Riyadh, Saudi Arabia. He cited the growing demand for more medical facilities throughout the Kingdom.

To provide integrated health services and optimum services to the public, the Ministry of Health has embarked on new projects such as family health and home health care programs. The Ministry of Health has urged the contractors to complete these new construction projects without delay.

With these development programs, the facilities and equipments of the hospital will be housed in six (6) model towers. The first tower will have 368 beds, including 100-bed intensive care units and 40 beds for general patients.
